

THE POWER OF ILLUMINATION

FLOODLIGHTING
& ELECTRICAL

PASSION, CULTURE,
PEOPLE, COMMITMENT...
A POWERFUL
COMBINATION

OUR PASSION

Lighting. It's our passion, our heritage.

For 40 years we've provided lighting solutions to sporting clubs, universities, schools, leisure centres, councils, sports stadia and multi-use games areas.

OUR CULTURE

We take the time to understand your unique project so we can recommend the right solution, and the right products. And we continue to support you with ongoing service and maintenance packages.

OUR PEOPLE

Our people are vastly experienced, fully trained and certified in installation and maintenance, and will collaborate with you at the design stage to achieve the best lighting solution.

OUR COMMITMENT

Our commitment is always to provide the best service in the right way to our customers and their communities, providing the best solution for all.

OUR SERVICES

FLOODLIGHT DESIGN

At the design stage we consider factors such as size of the floodlit area, local terrain, adjacent housing, height restrictions and the availability of a suitable electrical supply. And if necessary, we can help you with the planning process.

INSTALLATION

We have our own equipment, including 'cherry pickers' and winching equipment for erection of columns on-site and we'll always communicate the timescales and activities involved in every installation.

MAINTENANCE

Maintenance is an important aspect in ensuring the longevity of your lighting system. Our maintenance plans are tailored to your individual product, and floodlighting manufacturers provide their own guarantees.

AFTERSALES

With over four decades in the industry, we're able to pass on our cumulative expertise and thinking to all our customers. Our commitment to share the most up to date technology means that you'll always benefit from access to the very latest products and services as part of our aftersales service.

VENUE SUPPORT

Our energy savings advice can extend across all your facilities, including clubhouses, car parking areas and safety lighting. Our team of fully qualified electricians can also support any maintenance needs you may have, ensuring you make the very best use of your venue.

PLANNING

Planning is the crucial first step to ensure your floodlighting installation provides the right level of light, with each project being different. We will help you with planning and guide you through your industry's often unique requirements.

ENERGY SAVINGS

Never more relevant than in the current climate, we need to provide our customers with the ability to conserve power. Our experienced team will look at various ways to not only save energy use but also reduce energy cost.

THE POWER OF PARTNERSHIPS

OUR PASSION

Our approach to partnership is driven by a desire to build long term relationships. We'll stay in touch with you throughout the lifetime of every project, offering advice, guidance and aftersales support.

We complement our in-house capabilities with a network of trusted partners who recognise our quality and work with us to offer customers outstanding service.

Independence gives us access to the best products on the market and the flexibility to create a totally bespoke solution that meets your specific requirements.

STRATEGIC PARTNERSHIPS

We're proud that an increasing number of Governing bodies and key industry associations are putting their trust in us and endorsing the way we work across their networks.

These links provide us with invaluable insight and access – whether at grass roots or elite levels, as well as to schools, universities, local authorities and sports construction organisations.

As these partnerships develop and grow, so does our knowledge of the unique challenges and requirements of the various sectors we serve.

OUR STRATEGIC PARTNERS

WHAT WE DO WITH LIGHT

Cardiff Rugby, Cardiff Arms Park Official Floodlighting Partner

Full service and maintenance agreement in place, with a 'project team' approach for the redevelopment of the stadium and planned new training centre.

Llanelli Scarlets

Original installer of their current lighting. Now helping with service and maintenance support with current advice and guidance on LED upgrade.

Swansea Ospreys

Service and maintenance support for the Liberty Stadium, with current advice and guidance on a future full LED upgrade.

Velodrome, Newport

New LED lighting with light show options for the Geraint Thomas International indoor velodrome.

Banbury Utd

Replacing the original 1966 stanchions, Banbury United now have a full new LED system, perfect for tier 2 of the National League system. The install allows an increase in lux level should they move up to the National League and has reduced their energy use by 52%.

Rodney Parade

For both Newport Gwent Dragons RFC and Newport County FC, a full new LED upgrade was installed. This included a Dali switching system that allows dimming and light show options, resulting in a quality customer experience.

Caerphilly Tennis

Supported by our official partnership with Tennis Wales, a new set of columns and LED floodlights have transformed the Clubs facilities. Longer hours of floodlit play has helped the club increase their membership and deliver a quality experience to all.

Abergavenny Womens FC

Working with Monmouth County Council, a full LED lighting upgrade was installed achieving the level the Women's team required for their league status.

OUTSIDE OF SPORT WE ALSO WORK WITH...

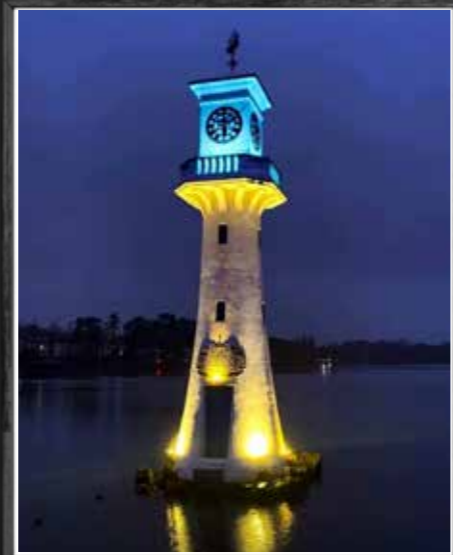

Christmas decorations in Cardiff

An exclusive 3 year agreement with Cardiff Council for the installation/removal and maintenance of the City's annual, Christmas Decorations project. This covers 25 streets and creates a fantastic seasonal display for the public and retailers to enjoy.

Roath Lighthouse, Cardiff.

Filtered coloured up lighting on the iconic setting of the Roath Lighthouse, in support of Ukraine and on behalf of the Cardiff City Council.

University Hospital, Cardiff

In perfect view of the hospital patients and their families, a wall was designated for sponsored stars from local businesses, with the image of an Angel, overlooking the hospital site.

Berwick upon Tweed, Royal Border Bridge

As requested by Northumberland County Council and in partnership with the architectural department, a coloured sequence lighting programme was installed via a boat located on the river. The result was an amazing and beautiful piece of art and became an instant tourist attraction and newsworthy project.

CERTIFICATIONS AND MEMBERSHIPS

Our certification service includes vertical and horizontal illumination levels, electrical compliance certificates and stadium floodlighting certification.

These all ensure that the team comply with all accreditation and health and safety requirements
